Hydrobiologia

The International Journal on Limnology and Marine Sciences

Volume 491, 15 January 2003

Special Issue

Recent Developments in Fundamental and Applied Plankton Research

Guest Editors

E. Van Donk, M. Boersma & P. Spaak

Preface
Ellen Van Donk, Maarten Boersma, Piet Spaak ix

Ramesh Gulati: a personal approach, based on his retirement lecture
S. Parma 1–8

PART ONE: BIODIVERSITY, DISTRIBUTION AND POPULATION DYNAMICS OF PLANKTON

Why plankton communities have no equilibrium: solutions to the paradox
Marten Scheffer, Sergio Rinaldi, Jef Huisman, Franz J. Weissing 9–18

Modeling *Daphnia* population dynamics and demography under natural conditions
W.M. Mooij, S. Hülsmann, J. Vijverberg, A. Veen, E.H.R.R. Lammens 19–34

Recruitment patterns of *Daphnia*: a key for understanding midsummer declines?
Stephan Hülsmann 35–46

Molecular techniques in phytoplankton research: from allozyme electrophoresis to genomics
A. De Bruin, B.W. Ibelings, E. Van Donk 47–63

Egg banks in freshwater zooplankton: evolutionary and ecological archives in the sediment
Luc Brendonck, Luc de Meester 65–84

On the combined analysis of proximate and ultimate aspects in diel vertical migration (DVM) research
Joop Ringelberg, Erik Van Gool 85–90

Diel variation in the vertical distribution of fish and plankton in Lake Kinneret: a 24-h study of ecological overlap
J. Easton, M. Gophen 91–100

Seasonal dynamics of rotifers in relation to physical and chemical conditions of the river Yamuna (Delhi), India
J. Arora, N.K. Mehra 101–109

Small-scale distribution and diel vertical migration of zooplankton in a shallow lake (Lake Naardermeer, the Netherlands)
S. Cerbin, D.J. Balayla, W.J. Van de Bund 111–117

Spatial and seasonal variation of the zooplankton in the coastal zone and main khors of Lake Nasser (Egypt)
Gamal M. El-Shabrawy, Henri J. Dumont 119–132

PART TWO: GRAZING BY PLANKTON AND THE IMPORTANCE OF FOOD QUALITY

Effects of UV-B irradiated algae on zooplankton grazing
Hendrika J. De Lange, Miquel Lürling 133–144

F_0-spectra of chlorophyll fluorescence for the determination of zooplankton grazing
Miquel Lürling, Antonie M. Verschoor 145–157

An approach to measure ciliate grazing on living heterotrophic nanoflagellates
Kirsten Christoffersen, Juan M. González 159–166

Autotroph:herbivore biomass ratios; carbon deficits judged from plankton data
Dag O. Hessen, Bjørn A. Faafeng, Pål Brettum 167–175

Implications of element deficits for zooplankton growth
William R. DeMott 177–184

Development and grazing of *Temora longicornis* (Copepoda, Calanoida) nauplii during nutrient limited *Phaeocystis globosa* blooms in mesocosms
W.C.M. Klein Breteler, M. Koski 185–192

Influence of toxic and non-toxic phytoplankton on feeding and survival of *Dreissena polymorpha* (Pallas) larvae
L.M. Dionisio Pires, R. Kusserow, E. Van Donk 193–200

Resource limitation and food quality for cladocerans in a tropical Brazilian lake
Aloysio S. Ferrão-Filho, Marlene S. Arcifa, Cláudia Fileto 201–210

Population growth of some genera of cladocerans (Cladocera) in relation to algal food (*Chlorella vulgaris*) levels
S. Nandini, S.S.S. Sarma 211–219

PART THREE: ROLE OF INFOCHEMICALS IN PLANKTON ECOLOGY

Chemically induced anti-predator defences in plankton: a review
Sandra Lass, Piet Spaak 221–239

Colony formation in *Scenedesmus*: a literature overview and further steps towards the chemical characterisation of the *Daphnia* kairomone
Frédérique L. Van Holthoon, Teris A. Van Beek, Miquel Lürling, Ellen Van Donk, Aede De Groot 241–254

Grazer-induced changes in the desmid *Staurastrum*
Karen Wiltshire, Maarten Boersma, Barbara Meyer 255–260

Differential sensitivity of green algae to allelopathic substances from *Chara*
G. Mulderij, E. Van Donk, J.G.M. Roelofs 261–271

The supposed lack of trade-off among *Daphnia galeata* life history traits is explained by increased adult mortality in *Chaoborus* conditioned treatments
A. Weber, S. Vesela, S. Repka 273–287

Contrasting migration behaviour of *Daphnia pulicaria* and *D. galeata* x *hyalina*, in avoidance of predation by 0+perch (*Perca fluviatilis*)
Ben J. G. Flik, J. Vijverberg 289–299

What goes down must come up: symmetry in light-induced migration behaviour of *Daphnia*
Erik Van Gool, Joop Ringelberg 301–307

PART FOUR: PREDATION ON ZOOPLANKTON AND PELAGIC FOODWEBS

Comparative population growth and life table demography of the rotifer *Asplanchna girodi* at different prey (*Brachionus calyciflorus* and *Brachionus havanaensis*) (Rotifera) densities
S.S.S. Sarma, E. Lucía Pavón-Meza, S. Nandini 309–320

Sub-fossils of cladocerans in the surface sediment of 135 lakes as proxies for community structure of zooplankton, fish abundance and lake temperature
Erik Jeppesen, Jens Peder Jensen, Torben L. Lauridsen, Susanne L. Amsinck, Kirsten Christoffersen, Martin Søndergaard, Stuart F. Mitchell 321–330

Effects of different fish species and biomass on plankton interactions in a shallow lake
Adrian E. Williams, Brian Moss 331–346

Top-down control in pelagic systems: a role for invertebrate predation
S.C. Blumenshine, K.D. Hambright 347–356

The Limnotrons: a facility for experimental community and food web research
Antonie M. Verschoor, Jelger Takken, Boris Massieux, Jacobus Vijverberg 357–377
